

Table of Contents

Preface	v
Chapter 1: Introduction	1
1.1. Approach.	1
Chapter 2: Basic Soil Mechanics	5
2.1. Introduction.	5
2.2. Soil Mechanics.	5
2.2.1. Definition.	5
2.2.2. Soil Creation.....	7
2.2.3. Soil Classification.	8
2.3. Soils.	11
2.3.1. Sand.....	11
2.3.2. Clay.	13
2.3.3. Rock.	15
2.4. Soil Mechanical Parameters.	21
2.4.1. Grain Size Distribution/Particle Size Distribution.	21
2.4.2. Atterberg Limits.	21
2.4.3. Mass Volume Relations.	23
2.4.4. Permeability.	28
2.4.5. The Angle of Internal Friction.....	30
2.4.6. The Angle of External Friction.	31
2.4.7. Shear Strength.	32
2.4.8. UCS or Unconfined Compressive Strength.....	34
2.4.9. Unconfined Tensile Strength.....	35
2.4.10. BTS or Brazilian Tensile Strength.	35
2.4.11. Hardness.	35
2.5. Criteria & Concepts.	37
2.5.1. Failure Criteria.	37
2.5.2. The $\Phi=0$ Concept.....	37
2.5.3. Factors Controlling Shear Strength of Soils.	37
2.5.4. Friction, Interlocking & Dilation.....	38
2.5.5. Effective Stress.....	38
2.5.6. Pore Water Pressure: Hydrostatic Conditions.	39
2.5.7. Pore Water Pressure: Capillary Action.....	39
2.5.8. Darcy's Law.	39
2.5.9. Brittle versus Ductile Failure.	41
2.6. Soil Mechanical Tests.....	43
2.6.1. Sieve Analysis.	43
2.6.2. Hydrometer Analysis.....	43
2.6.3. Standard Penetration Test.....	44
2.6.4. Cone Penetration Test.	45

The Delft Sand, Clay & Rock Cutting Model.

2.6.5.	Triaxial Test	47
2.6.6.	Shear Test.....	49
2.6.7.	Point Load Test.	50
2.7.	Nomenclature.	53
2.8.	The Mohr Circle.	55
2.9.	Active Soil Failure.....	61
2.10.	Passive Soil Failure.	65
2.11.	Summary.	69
2.12.	Shear Strength versus Friction.....	71
2.13.	Nomenclature.	73
Chapter 3:	The General Cutting Process.	75
3.1.	Cutting Mechanisms.	75
3.2.	Definitions.	76
3.3.	The Flow/ Shear/Crushed Type.	77
3.3.1.	The Equilibrium of Forces.	77
3.3.2.	The Individual Forces.....	79
3.4.	The Curling Type.	80
3.5.	The Tear Type and Chip Type.....	82
3.6.	The Snow Plough Effect.....	87
3.6.1.	The Normal and Friction Forces on the Shear Surface and Blade.....	87
3.6.2.	The 3D Cutting Theory.	87
3.6.3.	Velocity Conditions.....	87
3.6.4.	The Deviation Force.....	90
3.6.5.	The Resulting Cutting Forces.....	91
3.7.	Example Program in Visual Basic 6.....	91
3.8.	Finding the Shear Angle.	92
3.9.	Specific Cutting Energy E_{sp}	92
3.10.	Nomenclature.	93
Chapter 4:	Which Cutting Mechanism for Which Kind of Soil?	95
4.1.	Cutting Dry Sand.....	95
4.2.	Cutting Water Saturated Sand.	96
4.3.	Cutting Clay.	97
4.4.	Cutting Rock Atmospheric.	99
4.5.	Cutting Rock Hyperbaric.....	101
4.6.	Summary.	103
4.7.	Nomenclature.	104
Chapter 5:	Dry Sand Cutting.	105
5.1.	Introduction.	105
5.2.	Definitions.	105
5.3.	The Equilibrium of Forces.....	106
5.4.	An Alternative Shape of the Layer Cut.	110
5.5.	The Influence of Inertial Forces.	111

The Delft Sand, Clay & Rock Cutting Model.

5.6.	Specific Energy.	117
5.7.	Usage of the Model for Dry Sand.	117
5.8.	Experiments in Dry Sand.	119
5.8.1.	Hatamura & Chijiwa (1977B).	119
5.8.2.	Wismer & Luth (1972B).	121
5.9.	Nomenclature.	122
Chapter 6:	Saturated Sand Cutting.	123
6.1.	Introduction.	123
6.2.	Definitions.	123
6.3.	Cutting Theory Literature.	124
6.4.	The Equilibrium of Forces.	127
6.5.	Determination of the Pore Pressures.	129
6.6.	Numerical Water Pore Pressure Calculations.	131
6.7.	The Blade Tip Problem.	137
6.8.	Analytical/Numerical Water Pore Pressure Calculations.	138
6.9.	Determination of the Shear Angle β	145
6.10.	The Coefficients a_1 and a_2	148
6.11.	Determination of the Coefficients c_1 , c_2 , d_1 and d_2	149
6.11.1.	Approximations.	150
6.12.	Specific Cutting Energy.	152
6.12.1.	Specific Energy and Production in Sand.	153
6.12.2.	The Transition Cavitating/Non-Cavitating.	157
6.12.3.	Conclusions Specific Energy.	157
6.12.4.	Wear and Side Effects.	158
6.13.	Experiments.	161
6.13.1.	Description of the Test Facility.	161
6.13.2.	Test Program.	169
6.13.3.	Water Resistance.	170
6.13.4.	The Influence of the Width of the Blade.	170
6.13.5.	Side Effects.	170
6.13.6.	Scale Effects.	172
6.13.7.	Comparison of Measurements versus Theory.	173
6.13.8.	Location of the Resulting Cutting Force.	173
6.13.9.	Verification of the Theory in 200 μm Sand.	174
6.13.10.	Verification of the Theory in 105 μm Sand.	176
6.13.11.	Determination of ϕ and δ from Measurements.	179
6.14.	General Conclusions.	182
6.15.	The Snow Plough Effect.	182
6.16.	Nomenclature.	188
Chapter 7:	Clay Cutting.	191
7.1.	Definitions.	191
7.2.	Introduction.	191

The Delft Sand, Clay & Rock Cutting Model.

7.3.	The Influence of Strain Rate on the Cutting Process.....	193
7.3.1.	Introduction.....	193
7.3.2.	The Rate Process Theory.....	193
7.3.3.	Proposed Rate Process Theory.....	195
7.3.4.	The Proposed Theory versus some other Theories.....	199
7.3.5.	Verification of the Theory Developed.....	200
7.3.6.	Abelev & Valent (2010).....	203
7.3.7.	Resulting Equations for the Cutting Process.....	204
7.4.	The Flow Type.....	207
7.4.1.	The Forces.....	207
7.4.2.	Finding the Shear Angle.....	209
7.4.3.	Specific Energy.....	211
7.5.	The Tear Type.....	215
7.5.1.	Introduction.....	215
7.5.2.	The Normal Force on the Shear Plane.....	215
7.5.3.	The Mobilized Shear Strength.....	217
7.5.4.	The Resulting Cutting Forces.....	219
7.6.	The Curling Type.....	222
7.6.1.	Introduction.....	222
7.6.2.	The Normal Force on the Blade.....	222
7.6.3.	The Equilibrium of Moments.....	224
7.7.	Resulting Forces.....	230
7.8.	Experiments in Clay.....	234
7.8.1.	Experiments of Hatamura & Chijiwa (1977B).....	234
7.8.2.	Wismer & Luth (1972B).....	238
7.9.	Nomenclature.....	239
Chapter 8:	Rock Cutting: Atmospheric Conditions.....	241
8.1.	Introduction.....	241
8.2.	Cutting Process & Failure Criteria.....	242
8.2.1.	Some Relations.....	246
8.2.2.	Brittle versus Ductile.....	247
8.2.3.	Based on UTS and UCS.....	249
8.2.4.	Based on BTS and UCS.....	250
8.2.5.	Hoek & Brown (1988).....	251
8.2.6.	Parabolic Envelope UTS and UCS.....	255
8.2.7.	Ellipsoid Envelope UTS and UCS.....	256
8.2.8.	Linear Failure Criterion.....	258
8.2.9.	The Griffith (Fairhurst, 1964) Criterion.....	258
8.2.10.	Conclusions & Discussion.....	259
8.3.	Cutting Models.....	261
8.3.1.	The Model of Evans.....	262
8.3.2.	The Model of Evans under an Angle ϵ	264

The Delft Sand, Clay & Rock Cutting Model.

8.3.3.	The Model of Evans used for a Pick point.	266
8.3.4.	Summary of the Evans Theory.	267
8.3.5.	The Nishimatsu Model.	269
8.4.	The Flow Type (Based on the Merchant Model).....	273
8.5.	Determining the Angle β	276
8.6.	The Shear Type, Tear Type and the Chip Type.....	279
8.7.	Correction on the Tear Type and the Chip Type.	287
8.8.	Specific Energy.	289
8.9.	Resulting Forces & Mohr Circles.	291
8.10.	Example.	294
8.10.1.	Step 1: Brittle Shear.	294
8.10.2.	Step 2: The Transition Brittle Shear/Brittle Tensile.....	294
8.10.3.	Step 3: Applying Tensile Strengths of -5 MPa, -10 MPa and -25 MPa.	295
8.11.	Nomenclature.	295
Chapter 9:	Rock Cutting: Hyperbaric Conditions.	297
9.1.	Introduction.	297
9.2.	The Flow Type and the Crushed Type.	299
9.3.	The Tear Type and the Chip Type.	305
9.4.	The Curling Type.	305
9.5.	Experiments of Zijsling (1987).....	312
9.6.	Specific Energy.	317
9.7.	Example.	318
9.8.	Specific Energy Graphs.	319
9.9.	Nomenclature.	322
Chapter 10:	The Occurrence of a Wedge.	325
10.1.	Introduction.	325
10.2.	The Force Equilibrium.	326
10.3.	The Equilibrium of Moments.	331
10.4.	Nomenclature.	332
Chapter 11:	A Wedge in Dry Sand Cutting.	333
11.1.	Introduction.	333
11.2.	The Force Equilibrium.	334
11.3.	The Equilibrium of Moments.	337
11.4.	Results of some Calculations.....	339
11.5.	Experiments of Hatamura & Chijjiwa (1977B).....	341
11.6.	Nomenclature.	343
Chapter 12:	A Wedge in Saturated Sand Cutting.	345
12.1.	Introduction.	345
12.2.	The Equilibrium of Forces.....	347
12.3.	Pore Pressures.....	349
12.4.	The Equilibrium of Moments.	357
12.5.	The Non-Cavitating Wedge.....	360

The Delft Sand, Clay & Rock Cutting Model.

12.6.	The Cavitating Wedge	362
12.7.	Limits.....	362
12.8.	Experiments.....	367
12.9.	The Dynamic Wedge.....	374
12.10.	Nomenclature.....	375
Chapter 13:	A Wedge in Clay Cutting.....	377
13.1.	Introduction.....	377
13.2.	The Equilibrium of Forces.....	378
13.3.	The Equilibrium of Moments.....	381
13.4.	Nomenclature.....	384
Chapter 14:	A Wedge in Atmospheric Rock Cutting.....	385
14.1.	Introduction.....	385
14.2.	The Equilibrium of Forces.....	385
14.3.	The Equilibrium of Moments.....	389
14.4.	Nomenclature.....	391
Chapter 15:	A Wedge in Hyperbaric Rock Cutting.....	393
15.1.	Introduction.....	393
15.2.	The Equilibrium of Forces.....	393
15.3.	The Equilibrium of Moments.....	397
15.4.	Nomenclature.....	399
Chapter 16:	Exercises.....	401
16.1.	Introduction.....	401
16.2.	Chapter 2: Basic Soil Mechanics.....	401
16.2.1.	MC: Mohr Circles.....	401
16.2.2.	MC: Active/Passive Soil Failure.....	401
16.2.3.	MC: Active/Passive Mode.....	401
16.2.4.	MC: Active/Passive Soil Failure.....	402
16.2.5.	MC: Mohr Circles.....	402
16.2.6.	Calc.: Bulldozer 1.....	403
16.2.7.	Calc.: Bulldozer 2.....	404
16.3.	Chapter 3: The General Cutting Process..	405
16.3.1.	MC: Cutting Mechanism.....	405
16.3.2.	MC: The Snow Plough.....	405
16.4.	Chapter 4: Which Cutting Mechanism for Which Kind of Soil.....	406
16.4.1.	MC: Dry Sand Cutting.....	406
16.4.2.	MC: Water Saturated Sand Cutting.....	406
16.4.3.	MC: Clay Cutting.....	406
16.4.4.	MC: Atmospheric Rock Cutting.....	406
16.4.5.	MC: Hyperbaric Rock Cutting.....	407
16.5.	Chapter 5: Dry Sand Cutting.....	407
16.5.1.	MC: Soil Mechanical Parameters.....	407
16.5.2.	MC: The Shear Angle.....	407

The Delft Sand, Clay & Rock Cutting Model.

16.5.3.	Calc.: The Shear Angle.	408
16.6.	Chapter 6: Water Saturated Sand Cutting.	409
16.6.1.	MC: Soil Mechanical Parameters.	409
16.6.2.	MC: Dilatation.	409
16.6.3.	MC: Cavitation.	409
16.6.4.	Calc.: Porosity.	409
16.6.5.	Calc.: Density.	409
16.6.6.	Calc.: Permeability.	410
16.6.7.	Calc.: Dilatancy.	410
16.6.8.	Calc.: Transition Velocity.	410
16.6.9.	Calc.: Cutting Forces & Specific Energy.	410
16.6.10.	Calc.: Cutting Forces & Specific Energy.	414
16.7.	Chapter 7: Clay Cutting.	418
16.7.1.	Calc.: Cutting Forces.	418
16.7.2.	Calc.: Cutting Forces & Mechanisms.	418
16.8.	Chapter 8: Atmospheric Rock Cutting.	420
16.8.1.	Calc.: Cutting Forces & Mechanisms.	420
16.8.2.	Calc.: Cutting Forces & Mechanisms.	422
16.8.3.	Calc.: Cutting Forces & Mechanisms.	423
16.8.4.	Calc.: Cutting Forces & Mechanisms.	425
16.8.5.	Calc.: Cutting Forces & Mechanisms.	427
16.9.	Chapter 9: Hyperbaric Rock Cutting.	429
16.9.1.	MC: Soil Mechanical Parameters.	429
1.1.1	Exercise 2.	429
Chapter 17:	Bibliography.	431
Chapter 18:	Figures & Tables.	435
18.1.	List of Figures.	435
18.2.	List of Figures in Appendices.	443
18.3.	List of Tables.	449
18.4.	List of Tables in Appendices.	451
Chapter 19:	Appendices.	453
Appendix A:	Active & Passive Soil Failure Coefficients.	A-1
Appendix B:	Dry Sand Cutting Coefficients.	B-3
B.1	Standard Configuration.	B-3
B.1.1	Standard $h_b/h_i=1$	B-3
B.1.2	Standard $h_b/h_i=2$	B-5
B.1.3	Standard $h_b/h_i=3$	B-7
B.2	Alternative Configuration.	B-9
B.2.1	Alternative $h_b/h_i=1$	B-9
B.2.2	Alternative $h_b/h_i=2$	B-11
B.2.3	Alternative $h_b/h_i=3$	B-13
B.3	Percentage of Inertial Forces.	B-15

The Delft Sand, Clay & Rock Cutting Model.

Appendix C:	Dimensionless Pore Pressures p_{1m} & p_{2m}.	C-19
Appendix D:	The Shear Angle β Non-Cavitating.	D-21
Appendix E:	The Coefficient c_1.	E-25
Appendix F:	The Coefficient c_2.	F-29
Appendix G:	The Coefficient a_1.	G-33
Appendix H:	The Shear Angle β Cavitating.	H-37
Appendix I:	The Coefficient d_1.	I-41
Appendix J:	The Coefficient d_2.	J-45
Appendix K:	The Properties of the 200 μm Sand.	K-49
Appendix L:	The Properties of the 105 μm Sand.	L-53
Appendix M:	Experiments in Water Saturated Sand.	M-57
M.1	Pore pressures and cutting forces in 105 μm Sand	M-57
M.2	Pore Pressures in 200 μm Sand.	M-63
M.3	Cutting Forces in 200 μm Sand.	M-69
Appendix N:	The Snow Plough Effect.	N-79
Appendix O:	Specific Energy in Sand.	O-91
Appendix P:	Occurrence of a Wedge, Non-Cavitating	P-95
Appendix Q:	Occurrence of a Wedge, Cavitating.	Q-99
Appendix R:	Pore Pressures with Wedge.	R-103
Appendix S:	FEM Calculations with Wedge.	S-109
S.1	The Boundaries of the FEM Model.	S-109
S.2	The 60 Degree Blade.	S-110
S.3	The 75 Degree Blade.	S-113
S.4	The 90 Degree Blade.	S-116
Appendix T:	Force Triangles.	T-119
Appendix U:	Specific Energy in Clay.	U-125
Appendix V:	Clay Cutting Charts.	V-129
V.1	The Flow Type.	V-129
V.2	The Tear Type.	V-132
V.3	The Curling Type.	V-135
Appendix W:	Rock Cutting Charts.	W-137
W.1	Brittle Shear.	W-137
W.2	The Transition Brittle Shear/Brittle Tensile A.	W-139
W.3	The Transition Brittle Shear/Brittle Tensile B.	W-140
W.4	Transition Ranges Brittle Shear/Brittle Tensile.	W-142
W.5	Brittle Tensile Failure based on Brittle Shear Shear Angle.	W-153
W.6	Brittle Tensile Failure based on Brittle Tensile Shear Angle.	W-155
Appendix X:	Hyperbaric Rock Cutting Charts.	X-157
X.1	The Curling Type of the 30 Degree Blade.	X-157
X.2	The Curling Type of the 45 Degree Blade.	X-161
X.3	The Curling Type of the 60 Degree Blade.	X-165
X.4	The Curling Type of the 75 Degree Blade.	X-169

The Delft Sand, Clay & Rock Cutting Model.

X.5	The Curling Type of the 90 Degree Blade.....	X-173
X.6	The Curling Type of the 105 Degree Blade.....	X-177
X.7	The Curling Type of the 120 Degree Blade.....	X-181
Appendix Y:	Applications & Equipment.....	Y-185
Y.1	Historic Dredges.....	Y-185
Y.2	Bucket Ladder Dredges.....	Y-187
Y.3	Cutter Suction Dredges.....	Y-189
Y.4	Trailing Suction Hopper Dredges.....	Y-193
Y.5	Backhoe Dredges.....	Y-197
Y.6	Clamshell Dredges.....	Y-199
Y.7	Bucket Wheel Dredges.....	Y-203
Y.8	Braun Kohle Bergbau.....	Y-205
Y.9	Deep Sea Mining.....	Y-207
Y.10	Cable Trenching.....	Y-211
Y.11	Offshore Pipeline Trenching.....	Y-213
Y.12	Dry Trenching.....	Y-215
Y.13	PDC Cutters (Oil & Gas Drilling).....	Y-217
Y.14	Bulldozers, Graders & Scrapers.....	Y-219
Y.15	Dry Mining.....	Y-221
Y.16	Tunnel Boring Machines.....	Y-223
Appendix Z:	Publications.....	Z-225
