Dredging Processes
The Cutting of Sand, Clay & Rock
Equipment

By

Dr.ir. Sape A. Miedema
Part 1: The Cutting of Sand, Clay & Rock - Equipment
Part 3: The Cutting of Sand, Clay & Rock - Theory
Part 4: The Loading of Trailing Suction Hopper Dredges
The Cutting of Sand, Clay & Rock Equipment
Preface

Lecture notes for the course OE4626 Dredging Processes, for the MSc program Offshore & Dredging Engineering, at the Delft University of Technology.

By Dr.ir. Sape A. Miedema, Friday, January 06, 2012

This part of the lecture notes shows photos and illustrations of dredging, trenching, drilling, mining and excavation equipment without comments. The purpose is to show the students on which kind of equipment the theory of the lecture notes can be applied.

Dr.ir. Sape A. Miedema

Chapter 1: History

Figure 1-1: Dredging machine 1760 (ARA, Staten van Holland 5675).
Figure 1-2: A dredge for canal works and a dredger (Swedish encyclopedia 1914).
Chapter 2: Bucket Ladder Dredges

Figure 2-1: A bucket ladder dredge (IHC).

Figure 2-2: Some bucket ladder dredges.
Chapter 3: Cutter Suction Dredges (CSD)

Figure 3-1: The Mashour (Suez Canal Port Authorities).

Figure 3-2: The Crawlcat (IHC).
Figure 3-3: The d’Artagnan, 28,200 kW.

Figure 3-4: A model cutter head (Delft University of Technology).
The Cutting of Sand, Clay & Rock - Equipment

Figure 3-5: A sand cutter head.

Figure 3-6: A rock cutter head.

Figure 3-7: A rock cutter head (van Oord).
Figure 3-8: An IHC rock cutter design.

Figure 3-9: Some of the largest seagoing CSD's.
Figure 3-10: Cutterhead (IHC).

Figure 3-11: Rock cutterhead (IHC).
Chapter 4: Trailing Suction Hopper Dredges (TSHD)

Figure 4-1: Gerardus Mercator (Jan de Nul).

Figure 4-2: The Gerardus Mercator (Jan de Nul).
Figure 4-3: The Christobal Colon (46,000 m³).

Figure 4-4: The Fairway (35,000 m³).
Figure 4-5: The Volvox Terranova rainbowing (van Oord).

Figure 4-6: TSHD with one suction pipe.
Figure 4-7: Drag head with helmet (1), visor (2), blades and heel.

Figure 4-8: Drag head with helmet (1), visor (2), blades and heel.
Figure 4-9: Some TSHD's.

Figure 4-10: Dutch drag head (left), California drag head (right).
Chapter 5: Backoe Dredges

Figure 5-1: A large backhoe dredge.

Figure 5-2: A large backhoe dredge.
Figure 5-3: The Goliath (van Oord).

Figure 5-4: The New York (Great Lakes Dredge & Dock Company).
Figure 5-5: Worlds largest's backhoe dredges.
Chapter 6: Clamshell Dredges

Figure 6-1: Line art drawing of a dredge (Pearson Scott Foresman).
Figure 6-2: The Chicago (Great Lakes Dredge & Dock Company).

Figure 6-3: The Chicago (Great Lakes Dredge & Dock company).
Figure 6-4: The biggest clamshell in the world.

Figure 6-5: The Chicago (Great Lakes Dredge & Dock Company).
Figure 6-6: A deep sea mining clamshell (Seatools).

Figure 6-7: Examples of clamshell/grab dredges.
Chapter 7: Bucket Wheel Dredges

Figure 7-1: A bucket wheel dredge (IHC).

Figure 7-2: Some of the largest bucket wheel dredges.
Figure 7-3: Dredging wheel (IHC).

Figure 7-4: Dredging wheel (IHC).
Figure 7-5: The world’s largest excavator.

Figure 7-6: 95m high, 215m long, 45500 tons, $100 million, 10 m/min, 76000 m³/day.
Chapter 8: Deep Sea Mining

Figure 8-1: Deep sea mining, the Solwara Field.

Figure 8-2: A deep sea mining excavator (IHC).
Figure 8-3: A deep sea mining excavator (IHC).

Figure 8-4: Deep sea mining excavators.
Figure 8-5: Sea floor production system.
Chapter 9: Trenching

Figure 9-1: Subsea Cable Trench Plough Sea Stallion 4 (IHC).

Figure 9-2: The SeaStallion Ormonde OWF (VSMC).
Figure 9-3: Some of the largest pipeline ploughs.

Figure 9-4: Some of the strongest pipeline trenching jets.

Figure 9-5: Some of the largest mechanical trenchers.
Figure 9-6: The Digging Donal (All Seas).

Figure 9-7: The Digging Donald (pipeline untouched).
Figure 9-8: Arm with digging chain.

Figure 9-9: Rock trencher (Rocksaw International).
Figure 9-10: Rock trencher (Rocksaw International).
Chapter 10: PDC Cutters

Figure 10-1: A set of PDC cutters (HeJianShi FuLiang Dril Manufactury).

Figure 10-2: PDC bits.

PDC cutters (Polycrystalline Diamond Composite) are widely used in petroleum/oil field PDC bit, ecological PDC exploration bits, gas exploration bits, PCD/PDC coal mining drill bits, ilfield drilling bits, currently, we developed new type of PDC cutters, and the length of the cutter is 32mm, with a round radius of the tungsten carbide substrate of the PDC cutter.
Figure 10-3: Percussion button bit and rotary drill bit (Varel International).
Figure 11-1: Drumcutter for dry mining applications.

Figure 11-2: Drumcutter for dry mining applications.
Figure 11-3: A tunnel boring machine.

Figure 11-4: An integrated TBM.
Figure 11-5: A TBM of Herrenknecht.

Figure 11-6: The WesterSchelde TBM.
